REMARKS

Applicant adopts the Examiner's suggestion set forth at the bottom of page 4 of the Office Action issued on April 20, 2007 and amends claim 1 accordingly. Support for the amendment to claim 1 may be found, for instance, at page 18 line 21 of the application as filed, disclosing in part the outputting of a result (where $y=2.03$) according to the present invention.

Applicant submits that this amendment will place the application in better form for consideration and that the objections and rejections in the pending Action are overcome. Applicant also believes this amendment places the application in condition for allowance, and respectfully requests that the Examiner allow this application to proceed to grant.

Respectfully submitted,

June 8, 2007

Attorney for Applicant
Valerie Neymeyer-Tynkov
